

WE LEAD CANCER CARE

ANNUAL REPORT 2019

2020 UPCOMING EVENTS

Please mark your calendar to save the date for these Covenant Cancer Care Center 2020 events. RSVP for some events is not available yet. For more information, please contact Heather McNeil at 989.583.5142.

Thursday, March 19 • 6:15-8:00 pm
WOMEN'S SPRING SURVIVORS EVENT

Covenant HealthCare Mackinaw

A FREE educational night for cancer survivors to discuss the benefits of movement. RSVP at 1.866.COVENANT (1.866.268.3626).

Friday, April 17 • 9:30 am-2:00 pm
METASTATIC CANCER RETREAT

Hopevale Church Conference Room

A FREE retreat focused on education and support activities for patients living with metastatic cancer and their caregiver. RSVP at 989.583.5142.

Friday, April 24 • 8:00 am-2:00 pm
THE SIXTH ANNUAL BREAST SYMPOSIUM

Horizons Conference Center

This continuing educational offering will provide tools to aid healthcare providers in the diagnosis and treatment of breast cancer.

Friday, September 18 • 8:00 am-2:00 pm
GI SYMPOSIUM

Zehnder's of Frankenmuth

This continuing educational offering will provide tools to aid healthcare providers in the diagnosis and treatment of gastro-intestinal cancers.

Saturday, September 19 • 9:00-11:00 am
SURVIVORS BREAKFAST

Horizons Conference Center

We come together every year for this FREE Cancer Survivor Celebration to support and celebrate survivors and caregivers.

Wednesday, October 21

Doors open 5:00 pm • Speaker 6:30 pm

WOMEN'S FALL SURVIVORS EVENT

Horizons Conference Center

A FREE evening for female patients and cancer survivors, with a health fair to promote a healthy lifestyle through treatment and beyond followed by an inspirational speaker.

Thursday, November 5 • 5:00-8:00 pm
PROSTATE SCREENING

Covenant HealthCare Mackinaw

Prostate Cancer is the second leading cause of cancer death in men. This screening is FREE for men age 50-70, uninsured or not covered for prostate screenings.

Bus. Dev. (AQ/RF) 2/20 12860

We are at the forefront of cancer.
Setting the standards. Centered on patients.

ACCREDITATIONS AND CERTIFICATIONS

Joining forces with the **MD Anderson Cancer Network®** allows Covenant Cancer Care Center to bring world-class cancer care to our local community with access to MD Anderson's evidence-based guidelines, best practices and advanced treatment protocols. MD Anderson is ranked #1 in cancer care in the U.S. News & World Report's annual "Best Hospitals" survey.

The **Commission on Cancer (COC)** recognizes Covenant Cancer Care Center for our commitment to provide comprehensive, high-quality, multidisciplinary, individualized care. COC program standards require facilities to create meaningful processes for implementation of patient-centered care.

Our accreditation by the **National Accreditation Program for Breast Cancers (NAPBC)** means we are voluntarily committed to providing the highest standards of care to patients with breast diseases. NAPBC requires a rigorous evaluation in a number of areas, including program leadership, use of evidence-based practices, surgery, imaging and quality-improvement processes.

Breast Imaging Center of Excellence (BICOE) designation is awarded to breast imaging centers that achieve excellence by seeking and earning accreditation in all American College of Radiology (ACR) voluntary breast-imaging accreditation programs and modules. Our facility is fully accredited by the ACR in mammography, stereotactic breast biopsy, breast ultrasound and breast MRI.

The **Diagnostic Imaging Center of Excellence (DICOE)** program is an achievement that goes beyond accreditation to recognize best-quality imaging practices and diagnostic care. Our ACR accredited imaging facility operates far above the accepted standard for accuracy, professionalism, patient safety and quality assurance to provide the best standard of patient care.

The ACR **Lung Cancer Screening Center** designation recognizes our facility has voluntarily committed to practice safe, effective diagnostic care for individuals at the highest risk for lung cancer.

We are proud to present the 2019 Covenant Cancer Care Center Annual Report. In this year's report, we not only recognize outcomes, but the work and people behind them. Inside you'll find an overview of our program and services, event highlights and data from our cancer registry.

We marked another significant milestone in 2019 as the beautifully remodeled Covenant Radiation Center was unveiled featuring an additional Elekta Versa HD™ Linear Accelerator to accommodate more patients for daily treatment. The Covenant Radiation Center has the only Elekta Versa HD with a cloud-based Brainlab/Exactrac in the United States. The expanded capabilities of this technology allow us to provide state-of-the-art cancer treatment to more patients in our community.

Each year, we conduct outreach programs to educate the community about various types of cancer, the risk factors involved, prevention strategies, and how early detection can improve outcomes for treatment and survival. In 2019, our outreach efforts were received by over 10,798 community members.

Moving into 2020, we are continuing to expand patient access to supportive and palliative care services, as well as increasing our offerings of clinical trials. Continued expansion of our research program is one of our top priorities.

This 2019 annual report is a product of the efforts of many professionals who have contributed their expertise and energy to the improvement of cancer care in our community. Please enjoy this comprehensive report and feel free to contact us for more information about our cancer services at 989.583.5020 or visit www.covenanthealthcare.com/main/cancercare.aspx.

It is an honor and privilege to serve the residents of the Great Lakes Bay Region and surrounding communities.

Sincerely,

Sussan M. Bays, MD, FACS

AGE AT DIAGNOSIS

PATIENT EXPERIENCE

Patient experience is the sum of all interactions, shaped by our organization's culture, that influences the patient's perception of extraordinary care. It's the things we do in the smallest moments that matter the most. Teamwork, communication and a caring presence mold the patient's experiences. On average, the Cancer Care Center's departments perform in the top 10 percent in the country. The Breast Health Center is in the top 3 percent in the country for patient loyalty (likelihood of recommending the service to friends/family). This is extraordinary! It shows how effective the hard work and dedication of these caregivers is in reducing patient suffering during the most difficult time of their lives.

Breast Health Center

I was impressed with the teamwork and how well they worked together.

~ Barbara

Infusion Therapy Center

Everyone at the Infusion Center is excellent. They are a great group of helpful, compassionate people.

~ Thomas

I want you to know what an exceptional organization you have! Every single staff member, without exception, was kind, truly concerned and provided me with excellent care! We have such a treasure in Saginaw!

~ Veronica

Radiation Center

I cannot indicate a single improvement from staff, process or treatment! Short of a complete cure to the disease, my team exceed expectations in every way possible! Cancer patients in this town are so blessed! Care like they share (to my knowledge) can be found nowhere!! God bless them all.

~ Cathy

Everyone I encountered during radiation was kind, considerate and cheerful. Great experience.

~ Anna

Everyone took time with us and explained our options. They were helpful and understood how fearful we were with this whole scary situation.

~ Mary

Surgical Oncology

My entire team worked together like a finely-tuned machine. They were all well informed of my situation and addressed it as a team. I've never seen such a high level of care from every angle.

~ Michaela

I don't think I could have received better care anywhere in the world - very excellent people.

~ Charles

CANCER SCREENINGS OFFER PEACE OF MIND

At Covenant Cancer Care Center, we focus on the prevention, early detection and treatment of cancer.

Breast Cancer

Getting annual mammograms beginning at age 40 is key to the best outcomes. Consider these facts:

- 3D mammography is available at all Covenant breast screening locations to best aid in the protection against breast cancer.
- About 1 in 8 American women (12.4 percent) will develop invasive breast cancer in her lifetime.
- Breast cancer typically produces no symptoms when the tumor is small and most easily treated.
- Mammography has helped reduce breast cancer mortality in the U.S. by nearly 40 percent since 1990.

To schedule a mammogram, call 989.583.6279 or visit www.covenanthealthcare.com/BreastScreening.

Lung Cancer

Screening for lung cancer is done with Low-Dose Computerized Tomography (LDCT). Quick and painless, it is performed without using x-ray dye or contrast. Consider these facts:

- In 2019, 1,119 LDCT screenings were performed at Covenant. Out of these screenings, 14 cancers were found.
- Lung cancer is the leading cause of cancer deaths in the United States.
- Because lung cancer is often not found until it is at an advanced stage, nearly 71 percent of those who develop it will die from the disease.
- Adults between the age of 55-77 who are current, heavy cigarette smokers or have quit smoking within the past 15 years are at high risk for lung cancer. Someone who has smoked about 1 pack a day for 30 years is considered a heavy smoker.

Contact your primary care physician to discuss LDCT screening or visit www.covenanthealthcare.com/LungScreening.

Colorectal Cancer

Screening for colorectal cancer is done either with a stool-based test or with a colonoscopy. Consider these facts:

- Colorectal cancer is the second-leading cause of cancer-related deaths in the U.S.
- Colorectal cancer typically produces no symptoms when the tumor is small and most easily treated.
- When it is found at an early stage, the 5-year relative survival rate is 90 percent.
- Regular screening can even prevent colorectal cancer. With a colonoscopy, doctors can find and remove polyps before they turn into cancer.
- Patients age 50-79 should undergo regular screenings.

To schedule a colorectal screening, call 989.583.7473 or visit www.covenanthealthcare.com/ColonScreening.

OUR SUPPORT TEAM

Social Workers

Oncology social workers are here to help patients cope with their new diagnosis and treatment. They equip patients and their care-givers with holistic self-care strategies (physical, emotional, mental and spiritual) that are helpful in adapting to their cancer journey – from treatment to aftercare. This includes learning to engage in a positive partnership with treatment staff, accessing valuable resources and connecting with support groups.

Gerry Bishop,
LMSW, M. Div

Alison VanNorman,
LMSW, OSW-C
989.583.5268 Tel

Registered Dietitian

The registered dietitian provides medical nutrition therapy to aid patients in coping with the side effects of treatments and the cancer itself. This therapy is essential in helping them maintain weight, increase strength and recover as quickly as possible. Our registered dietitian facilitates community education classes and meets with patients one-on-one.

Ann Hoffman,
RDN, CDE, CSO
989.583.5029 Tel

Nurse Navigators

The role of the navigator is to identify possible barriers to care, and work with the patient, their family and the clinical care team to provide a team-based care plan. Our navigators help by making the complicated more understandable, the overwhelming more manageable and the overall health experience patient-centered. The navigators help patients understand their diagnosis and treatment, assist them in setting up appointments and connect them to beneficial community and hospital-based resources.

COVENANT RADIATION CENTER

- Offers state-of-the-art technology including Stereotactic Ablative Radiosurgery (SABR), Intensity Modulated Radiotherapy (IMRT) and Image Guided Radiotherapy (IGRT).
- Our SABR technology targets tumors in the body (lung, liver, spine) with high doses of radiation and minimum damage to surrounding healthy tissue.
- Has the only Elekta Versa HD with a cloud-based Brainlab/Exactrac in the United States. This allows us to treat more complex cases including multiple individual brain lesions (instead of whole-brain treatment) to preserve healthy brain tissue.
- The only center in the region to offer Xofigo®, an injection used to treat bone metastasis from prostate cancer that no longer responds to hormonal or surgical treatment to lower testosterone.
- Has Brachytherapy for gynecologic and skin cancer. This allows placement of a sealed radiation source, delivering a higher treatment dose to a specific area.
- Utilizes the “gold standard” with frameless, non-invasive positioning devices.
- Participates in the Michigan Radiation Oncology Quality Consortium (MROQC). Our goal is to identify best practices in radiation therapy that minimize side effects patients may experience from radiation treatment.
- Typically sees non-emergent patients for a consult within 48 hours of referral.

The Covenant Radiation Center expansion was completed January 2019. This allowed us to add an additional linear accelerator which offers patients better access to the latest technology.

CANCER RESEARCH TEAM – ONCOLOGY FOCUS

Covenant Cancer Care Center has made increasing clinical trial offerings one of the top priorities over the past several years. In 2019 we continued to expand our research program with the help of the Central Research Team (pictured below). Covenant HealthCare is Michigan's first and only certified member of MD Anderson Cancer Network®, a program of MD Anderson Cancer Center. Through MD Anderson we completed the application to join the NRG, which is an oncology non-profit research organization formed to conduct clinical research and to broadly disseminate study results for informing clinical decision making and healthcare policy. This will lead to increased clinical trial offerings at Covenant for our oncology patients in 2020.

Benefits of Conducting Clinical Trials

- Research contributes to the expanding knowledge base of medicine and provides physicians/investigators the opportunity to offer patients the latest cutting-edge therapies.
- Research has resulted in hundreds of innovations that offer earlier diagnosis of illness, minimized side effects, less demanding administration processes and better outcomes.

2019 Research Highlights

- **TORAY study** enrolled 101 patients (Dr. Sussan Bays, principal investigator; Dr. Joseph Contino, sub investigator). In this study, blood samples and information are collected to determine if changes in blood miRNAs can predict breast cancer at biopsy for women who had breast imaging suspicious for breast cancer. If data from the study supports this, a blood test could potentially be developed eliminating the need for biopsies in the future.
- **TheraSphere study** enrolled 4 patients (Dr. Michael Warren, principal investigator). This radiotherapy treatment for hepatocellular carcinoma consists of millions of microscopic, radioactive glass microspheres being infused into the arteries that feed liver tumors.
- **Karyopharm Therapeutics Endometrial Cancer study** opened – enrollment goal 2 patients (Dr. Gregory Sutton, principal investigator). A phase 3 randomized, double-blind trial of maintenance with selinexor/placebo after combination chemotherapy for patients with advanced or recurrent endometrial cancer.
- **OnPro Kit study** opened – enrollment goal 60 patients (Dr. Binu Malhotra, principal investigator). Prospective observational study to estimate the incidence of febrile neutropenia among subjects with non-myeloid malignancies at high risk for febrile neutropenia.
- **Adynxx ADYX-006 study** opened – enrollment goal 6 patients (Dr. Sussan Bays, principal investigator). A phase 2 randomized, double-blind, placebo-controlled study to evaluate the safety and efficacy of a single intrathecal preoperative administration of brivoligide injection in patients with a pain catastrophizing scale score >16 undergoing mastectomy with immediate tissue expander or implant placement.

2020 MD Anderson Study Opportunities to Be Conducted at Covenant

- **TORCH:** Dr. Sutton – Endometrial cancer
- **OPAL:** Dr. Fugazzi – Targeted breast radiation
- **EXTEND:** Dr. Zaki – Targeted radiation for oligo-metastatic disease
- **LONESTAR:** Dr. Zaki – Non-small cell lung cancer
- **PanCRS-SBRT:** Dr. Zaki – Advanced pancreatic cancer
- **Bayer:** Dr. Malhotra – Colon cancer

If you have research related questions, contact Dianne Androsuk at 989.583.5173 or our research nurses at 989.583.6474.

SURVIVORSHIP PROGRAM

Over 200 Survivorship Care Plans (SCP) were distributed to Cancer Survivors in 2019.

What is a Survivorship Care Plan?

A SCP is designed to guide patients through difficulties that may arise following treatment. It is a written record of a patient's cancer treatment history and recommendations for follow up. The plan discusses further cancer screening, risk reduction, cancer prevention, management of late side effects and a psychosocial report.

Survivorship Resources Available at Covenant Cancer Care Center

SUPPORT GROUPS

- Coping with Cancer
- Support for People with Oral and Head and Neck Cancer
- Spousal Loss
- Women's Cancer Support
- Better Breathers Pulmonary Support
- Smoking Cessation

For a support group schedule or more information, call 989.583.5268.

NUTRITION COUNSELING CLASSES

- Learn how healthy eating can enhance survivorship, aid in preventing cancer recurrence, and help you gain strength and energy.

For a class schedule or more information, call 989.583.5029.

SMOKING CESSATION CLASSES

- Learn how to successfully quit smoking.
- Check your lung health status with on-site respiratory screening tools.

For a class schedule or more information, call 989.583.5014.

COVENANT ONCOLOGY REHABILITATION EDUCATION (CORE)

- Self-paced exercise and yoga classes for survivors.
- Improve strength, energy and quality of life.
- Alleviate pain, fatigue and stress.
- Lymphedema services provided.

For a class schedules or more information, call 989.583.5242.

(bottom) Dianne Androsuk, CCRC, Central Research Administrator

2019 COMMUNITY HIGHLIGHTS

The Leukemia & Lymphoma Society partnered with Subaru to spread hope, love and warmth to cancer patients at the Covenant Cancer Care Center. The representatives donated 80 specially-made blankets along with 10 arts and crafts kits.

Covenant Cancer Care Center participated in the annual **Making Strides Against Breast Cancer** walk to honor breast cancer survivors. Our team not only helped raise awareness about steps we can take to reduce the risk of breast cancer, but also raised \$8,231 to support the cause!

Thanks to Heritage High School for their contribution of \$2,000! Raised at the **Pink Out Game** in support of the Covenant Breast Health Center Care Fund, these dollars are used locally for the detection of breast cancer.

Covenant Cancer Care Center participated as a platinum sponsor in **Relay for Life**.

Covenant Cancer Care Center sponsored **Light the Night**, a fundraising campaign benefiting The Leukemia & Lymphoma Society's funding of research to find blood cancer cures. We are taking steps to end cancer – **WE LIGHT THE NIGHT!**

Five Below held a fundraiser shopping event for Covenant Cancer Care Center. For one week, 10 percent of all purchases were donated to the Cancer Center.

Covenant Cancer Care Center participated as a platinum sponsor in **Bringin' Back the 80s Festival**. Profits from this event are donated to cancer-related causes.
