

# YOUR GIFT MATTERS

## EARLIER DETECTION OF CORONARY MICROVASCULAR DYSFUNCTION

This year our annual campaign is focused on raising funds to purchase a CoroFlow cardiovascular diagnostic system. This equipment will support patients suffering from coronary microvascular dysfunction (sometimes called small artery disease or small vessel disease). This state-of-the-art equipment will allow earlier detection of the disease and positively impact medical outcomes. Join Covenant HealthCare in raising the standard of care for heart patients.

Extraordinary care for every generation.
