

Procedure codes for which providers must request prior authorization

For Blue Cross commercial, Medicare Plus BlueSM, BCN commercial and BCN AdvantageSM

Blue Cross Blue Shield of Michigan and Blue Care Network require health care providers to obtain approval before providing certain services. This approval is known as prior authorization and it helps to ensure that the services are appropriate for the patient's condition and are medically necessary. Some plans also have requirements about where to get certain services. While prior authorization is required for Blue Cross or BCN to process claims for certain services, it isn't the only requirement that must be met for claims to pay; for example, the member must have active coverage and the service must be part of the member's benefits. For more information, see the [Services That Need Prior Authorization](#) page on **bcbsm.com**.

This document provides a detailed list of CPT* codes and HCPCS codes for services that require prior authorization for most members as of the date specified later in this document. To determine whether prior authorization is required for a specific member, refer to the document titled [Determining prior authorization requirements for members](#).

Note: In general, the following categories of medical procedures require prior authorization: inpatient care, musculoskeletal procedures (joint replacement surgeries and other related arthroscopic procedures, pain management procedures and spinal surgeries), post-acute care, radiation oncology procedures, radiology procedures (high-tech imaging) and sleep studies.

To search for a procedure code in this document

1. Hold down the *Ctrl* key on your keyboard and press the *F* key.
2. Enter the procedure code in the *Find* field.
3. Click *Search* or an arrow to search for the procedure code.

Procedure codes are listed more than once in the following situations:

- They're managed by a different entity (Blue Cross Blue Shield of Michigan, Blue Care Network or a contracted vendor) for different lines of business.
- They started requiring prior authorization on different dates for different lines of business.

Information that's available for each procedure code

This document includes the following information for each procedure code that requires prior authorization:

- A description of the code
- The lines of business for which prior authorization is required. Lines of business are abbreviated as follows:
 - PPO = Blue Cross commercial — Some procedure codes require prior authorization for members who have coverage through Blue Cross

Procedure codes for which providers must request prior authorization

For Blue Cross commercial, Medicare Plus BlueSM, BCN commercial and BCN AdvantageSM

commercial fully insured groups and for select self-funded groups. To determine whether a procedure code requires prior authorization for a specific member, refer to the document titled [Determining prior authorization requirements for members](#).

- MAPPO = Medicare Plus Blue
- HMO = BCN commercial
- BCNA = BCN Advantage

If the provider doesn't know the member's line of business, they can log in to our provider portal (availability.com**), choose *Patient Registration* > *Eligibility and Benefits Inquiry*, and complete the required fields. Select the appropriate member in the Patient Information screen and click *Submit*. The member's plan is listed in the Plan / Product Information section of the Patient Information tab.

- The entity that manages prior authorization requests
- For newly added procedure codes only, the date of service on which the code will start requiring prior authorization will appear in the Effective Date cell. For procedure codes that currently require prior authorization, the Effective Date cell is blank.

Important: This document doesn't currently include a complete list of procedure codes for behavioral health services, although the following categories of services typically require prior authorization: outpatient autism services; outpatient transcranial magnetic stimulation; initial inpatient, residential or partial hospital care; and subacute detoxification.

Notation in the list of procedure codes

When you see "PPO*" in the *Lines of business* column, it means that the procedure code requires prior authorization for members who have coverage through Blue Cross commercial fully insured groups and for **select** self-funded groups. To determine whether a procedure code requires prior authorization for a specific member, refer to the document titled [Determining prior authorization requirements for members](#).

- (2) For certain diagnosis codes, you must complete a questionnaire in the e-referral system.
- (3) Elective pediatric feeding programs — both inpatient and outpatient — require authorization for BCN commercial members for dates of service on or after Sept. 1, 2020. Submit the request through the e-referral system. Use S0317 when submitting authorization requests for both inpatient and outpatient programs. For inpatient requests, do not add the length-of-stay procedure code. Use only the S0317 code when submitting inpatient authorization requests. For inpatient authorization requests that BCN approves, the length-of-stay procedure code will be added to the case. Bill a regular inpatient admission for reimbursement purposes. Do not bill elective inpatient pediatric feeding programs with the S0317 code.
