CEUs

Extraordinary care for every generation.

## Course Level Description and Target Audience

This course is designed to enhance the knowledge base for clinical staff to improve the multidisciplinary approach to care for their patients with a brain injury.

**Target Audience:** PT, PTA, OT, COTA, RN, LPN, CTRS, SLP, CM and SW

## Learning Objectives

Upon successful completion of this course, participants should be able to:

1. Identify two methods of treatment for brain tumors.
2. Describe post-concussion syndrome and the goals of treatment.
3. Name the three most common cognitive impairments following a brain injury and discuss one evidence based treatment strategy for each.
4. Identify two interventions to increase patient's self-advocacy skills.
5. Describe the management of agitation in a brain injury patient from the ICU to the home care phase.
6. Identify at least three deficits following a brain injury that can affect returning to drive.

## Outcome

Participant will learn how to treat the whole patient with a brain injury including post-concussion syndrome, treatment options of brain tumors, cognitive therapy, management of agitation and pain management as well as self-advocacy/BI resources and when patient may return to school, home, community and driving.

## Contact Hours

6.5 nursing contact hours and 6.0 social work CEUs pending will be awarded to participants who attend the entire activity and complete an activity evaluation.
